Washington, DC – U.S. Rep. Tom Rooney (FL-16) today issued the following statement after a bipartisan majority in the House voted to repeal Obamacare:

“Floridians already seeing the results of Obamacare – health care costs are going up for our families, our doctors are worried about having to leave their practices, and our small businesses are reluctant to hire new workers because of the law’s job-destroying taxes and mandates.

“We need to repeal Obamacare in its entirety so we can get our economy moving again and allow the private sector to grow and create jobs. Then we can get to work on step-by-step, patient-centered reforms to bring down costs and make health care more affordable for Florida families and small businesses.”
